software development, cloud computing, networking systems, managing systems, Java, Python, MySQL, user-friendly design, interactive elements, secure application development, backend development, database management, user interface design, website development, customer engagement, business growth, responsive design, SEO optimization, teamwork, communication, adaptability, efficiency, fast-paced environment, collaboration

Experience

Team Member — Pats Pizza

02/2024 – current date

- Collaborated with a diverse team to streamline kitchen operations, ensuring tasks were completed ahead of schedule and boosting overall productivity.
- Communicated effectively with team members to maintain clean, organized workspaces, which improved efficiency and workflow.
- Quickly adapted to new processes and safety procedures to ensure compliance with food hygiene standards, reflecting the ability to learn and apply new skills efficiently.
- Improved team efficiency by organizing and maintaining storage areas, ensuring that supplies were easily accessible, and workstations were optimized.

Bar Assistant — The Bailey

07/2023 – 02/2024

- Interacted with customers directly, providing excellent service and ensuring their needs were met, improving customer satisfaction and communication skills.
- Worked efficiently with team members to ensure bar areas were restocked and prepared, maintaining smooth operations during busy periods.
- Handled customer requests for drinks and snacks, learning quickly how to manage multiple orders and provide timely service in a fast-paced environment.

Projects

School Computing Department Website

Developed a website to provide essential information for computing students applying to the department, focusing on user-friendly design and interactive elements.

HTML, CSS, JavaScript

Banking Application System

Developed a secure banking application with login and sign-up functionality, demonstrating backend development and database management skills with MySQL. Supported up to 1,000 simulated transactions.

Java, MySQL

Tasty Tucker Café Website

Developed and launched a responsive and SEO-optimized website for Tasty Tucker Café using WordPress, driving a significant increase in customer engagement and business growth.

WordPress, HTML, CSS, JavaScript
